

**Registration First Year Students, Both Seminaries
1997-2005**

Highlights

Implementation of the current major tuition support effort started in the late 1990s. It led to 40% increase in combined First Year Enrollments by 2003.

Decline of about 33% from 2003 to 2005 reflected increases in tuition and changes in some conditions of support. This apparently introduced uncertainties as to future support levels.
